

## PROTECTING OUR WORLD

Ramora UK services ensure you and your assets are safe from explosives through **planning, training,** and the **practical removal** of ordnance

# RAMORA UK FIRST

- The first UK commercial company authorised to deliver Explosive Ordnance Disposal (EOD) on mainland UK
- The first to design and operate a purpose built, commercially available, sub surface Remote Explosive Ordnance Disposal System (REODS)
- First to disrupt Improvised Explosive Device (IED) under water using Remotely Operated Underwater Vehicle (ROV) technology
- Worked to develop the industry standard safety guidelines

## OUR SERVICE PRIORITIES

**Safety** Setting the industry standards.

**Reliability** You can rely on us to be professional, efficient, and highly responsive to your needs. We are well versed at working in both sensitive and challenging environments.

**Technology** At Ramora UK we actively use, develop and train in new technologies to increase safety, efficiency and expediency.

**Control** To ensure our stringent quality standards only Ramora UK employees deliver EOD services. Where external expertise is required Ramora UK oversees and manages the entire delivery process.

## EXPERTISE

Ramora UK services are delivered by fully qualified and highly experienced former UK military personnel. Each has significant experience in the field of EOD and IED. With enhanced training development at Ramora UK these experts become the most qualified, highly experienced and competent service providers in the world.

“RAMORA UK will be the undisputed world leader in EOD services and training.”

We will do this by continuing to recruit and to develop the best, most experienced staff, utilise modern technology and techniques, by providing the highest most responsive levels of service whilst rigorously maintaining superior safety standards.

We currently set the industry benchmark standards and as a result are being regarded as the experts in our field and Industry preferred supplier.

“Ramora UK are efficient and professional. They took control of the situation and made everyone feel at ease.”

Mr Richard Kendall, Kendall Bros Ltd, Aggregates

# RAMORA SERVICE SUMMARY

## Training

We provide a range of training services from explosives awareness to land and maritime Explosive Ordnance Disposal (EOD) and Improvised Explosive Device Disposal (IEDD) training.

## Facilities

Our modern facilities allow us to provide the best training available with practical work shops, seminar rooms and live fire ranges ensuring a learning experience that endures.

## Consultancy

As the recognised industry experts, we provide advice, guidance and project management services including explosives, security and counter terrorism to risk mitigation and reduction.

## Equipment Solutions

Our specialist knowledge and experience allows us to provide advice, procurement, associated training and integration services to ensure you are best equipped to remain protected and maintain operational capability.

## Practical Services

Land and Maritime EOD clearance by our experts. With over 100 years of combined EOD experience, our Ramora UK team provide a highly reactive disposal service. Whether it is inland or at sea our qualified personnel will defuse any situation.

*Ramora UK's expert response to our service needs was thorough and highly professional throughout.*  
Mr Robin Middleton, CBE, Former SOSRep Maritime Salvage and Intervention

## OIL AND GAS

Protecting Oil and Gas facilities from Unexploded Ordnance (UXO) and Remnants of War (RoW) is vitally important to maintain a credible national infrastructure. We at Ramora UK operate REODS, a purpose built maritime EOD system operated by our team of EOD operators, to deal with any sub surface UXO. We also provide land EOD services with a 24hr emergency response centre.

## CORPORATE

The provision of timely and relevant explosive security consultancy and awareness training ensures companies meet their statutory duties to employee safety. In addition the provision of specialist guidance and methodologies can enhance operational output and reduce overheads.

## MILITARY AND LAW

Specialist response teams require the best possible training to ensure the maintenance and availability of adequately qualified and experienced personnel. The delivery of a quantifiable operational capability in line with the clients expectations is paramount.

## AGGREGATES AND CONSTRUCTION

Our EOD services ensure companies within this sector meet their responsibilities with regards to ordnance discovered during projects.

## MARITIME

The considerable difficulties faced by salvage contractors can often be eased by the support of our specialist explosives cutting team where salvage operations need to be expedited for environmental or other reasons.

## TRANSPORTATION

Consultancy and awareness training by our highly experienced operatives providing enhanced capability and awareness to vital transportation infrastructures including road, rail and aviation.

# TRAINING SERVICES

At Ramora UK we provide certified education and training packages for the bespoke needs of Governments and other organisations worldwide.

Ramora UK employees, each highly experienced former military personnel, deliver training in a number of specialist areas. Ranging from explosives awareness training to Military and Security Forces training, each course is delivered to the very highest standards. Our blend of unique course materials, class room sessions, practical demonstrations and scenario based training engage with the audience and increase learning potential.

## Counter Terrorist Training/Special Operations

- Improvised Explosive Device Disposal Operator (IEDD) – Basic to Advanced
- High Risk Search (HRS)
- Underwater Search
- Explosive Methods of Entry (EMOE)
- Explosive Demolition
- SWAT Training

## Awareness Training

- Improvised Explosive Device (IED) awareness e.g. security and mail room staff
- Unexploded Ordnance (UXO) awareness e.g. aggregates and construction industry

## Security

- International Ship and Port Security (ISPS) – SSO/CSO/PFSO

## Explosive Ordnance Disposal (EOD)

- Conventional Munitions Disposal (CMD) – Basic to Advanced
- De-mining
- Chemical, Biological, Radiological and Nuclear (CBRN)
- Explosives Range Safety

**Others available – Contact us to discuss your training requirements**

*“Ramora UK provided an exemplary service far exceeding our training needs.”*  
Foreign Government Representative

# FACILITIES

## Head Quarters

A modern, state of the art, purpose built commercial centre

## Auditorium and Training Suite

A suite of adaptable training rooms catering for classes of 20 people or lectures of up to 50 with changing and refreshment facilities

## Practical Training

Explosive demonstrations, live firing range, IEDD village, woodland and maritime facilities can be combined with practical scenario based training

# SECURITY CONSULTANCY SERVICES

The provision of timely, specialist advice is often vital for clients wishing to protect assets and staff, or to move forward in a particular project or region. At Ramora UK our highly experienced personnel provide Military, Governments, Police and large commercial enterprises through out the world with consultant services in areas ranging from explosives, security and counter terrorism, to risk mitigation and reduction.

- Global terrorist threats
- Advice to staff deploying overseas
- Client reports (area specific)
- Assessment of company security procedures
- International Ship and Port Facility Security Code (ISPS Code)
- Provision of exercise planning, management and conduct
- Emergency contingency planning
- Incident response line (24/7)
- Training advice
- Independent audit and verification

# PRACTICAL SERVICES

## Remote Explosive Ordnance Disposal System (REODS)

### 24/7 EMERGENCY GLOBAL RESPONSE

Our dedicated REODS is purpose built for maritime Explosive Ordnance Disposal (EOD). Combining cutting edge technology with highly experienced personnel, REODS removes maritime Unexploded Ordnance (UXO) and Remnants of War (RoW) from pipelines, platforms and the open seabed safely and efficiently.

## World Wide EOD Clearance and Demining

We are a premium global supplier of post conflict demilitarisation services. Detecting and safely destroying mines and Unexploded Ordnance (UXO) for safe civilian traffic, construction and the further development of infrastructure is a task we take great professional pride in delivering.

## UK EOD Response

At Ramora UK we provide a 24hr, UK wide, practical response to incidents involving Unexploded Ordnance (UXO) and Time Expired Pyrotechnics (TEPs). All Ramora UK EOD response vehicles are fully equipped and licensed under the stringent 'Carriage of Dangerous Goods' Legislation. Our operatives are highly experienced former military personnel trained to deliver safe and commercially aware solutions.

# EQUIPMENT SOLUTIONS

We have extensive experience and a comprehensive understanding of market needs, product specifications, operating environments, supply base and training requirements, and of detailed project management. These skills are combined to provide a 'single source' turn key service, delivering your security equipment needs.

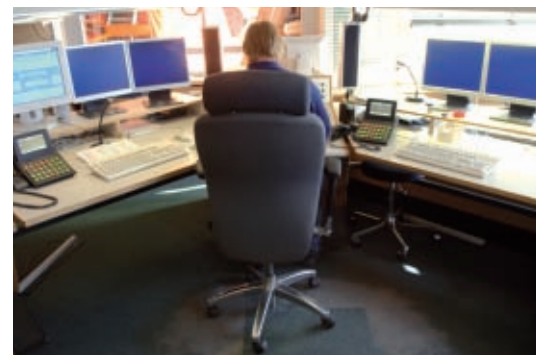

This comprehensive service ensures seamless product integration into your current infrastructure and delivers maximum product effectiveness and increased capability from the point of delivery.

## 24/7 EMERGENCY RESPONSE CENTRE

Our immediate response service allows you to speak directly with an expert to advise on the severity of a situation, best course of action and if necessary, dispatch personnel promptly to manage the situation.

**Sign up now for immediate incident support**
