

Maritime Explosive Ordnance Disposal (EOD)

Ramora UK is an Explosive Ordnance Disposal (EOD) company, providing practical services, training, consultancy and equipment solutions worldwide.

Although we offer many services relating to EOD, we specialise in the maritime arena, currently providing maritime EOD services to some of the world's largest oil and gas companies, along with companies in the renewables sector and foreign Governments.

All Ramora UK operational staff are former senior military personnel, with over 100 years of collective experience in EOD both land and maritime arenas. From this experience, Ramora UK are setting the industry standards in EOD, introducing best practices, forming new legislation and developing EOD systems.

Capability

- Relocation and Disposal of Maritime UXO
- Guaranteed Response
- 808 and 804 Qualified EOD Divers
- Specialists in Bomb Disposal
- Consultancy
- City and Guilds Accredited Training
- 24/7 Telephone Hotline
08452 608999

Tel: +44 (0) 8454 608911

Maritime EOD

Explosive Ordnance Disposal

Client Preparation

- Accredited training of key personnel such as emergency response staff, company representatives and managers
- Establishment of the required documented protocols, reporting procedures, controls and licences

Emergency Reaction

- Offshore EOD team on standby 24/7/365
- Within 24 hours of receiving a confirmed emergency call, the offshore EOD team and equipment can be dispatched to an offshore support vessel anywhere in the world
- Equipment is minimal, not to impact the support vessels footprint, with our systems fully compatible into the vessels own equipment
- UXO is safely identified, disposed of and removed

Additional Capabilities

- Land EOD services
- Staff awareness training
- Documentation and procedures
- Exercise planning

24/7 EMERGENCY RESPONSE CENTRE

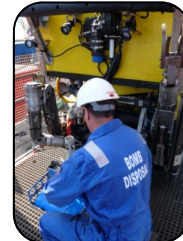

Our immediate response service allows you to speak directly with an expert to advise on the severity of a situation, best course of action and if necessary, dispatch personnel promptly to manage the situation.

EQUIPMENT

REODS

Our Remote Explosive Ordnance Disposal System (REODS) has been developed to safely relocate and dispose of an item of Unexploded Ordnance (UXO) on the sea bed without diver interaction. This is achieved by attaching our equipment to a ships Remotely Operated Vehicle (ROV).

Containers

All of our equipment can be stored in two containers (eight foot and ten foot) to reduce our impact on a vessels deck space. This includes our REODS, explosives, work area and tools. Dependent on requirements for a task, this footprint can be reduced even further, with the ability to mobilise our offshore EOD team with only a small store for explosives and tools.
